TED Technology is coming to VA Central California

FRESNO, Calif. – The Telehealth Education Delivered (TED) vehicle will be onsite at VA Central California Health Care System (VACCHCS) on Tuesday, Apr. 7 at 11 am.

This mobile demonstration vehicle is designed to showcase the many telehealth solutions available at the Department of Veterans Affairs (VA) today.

What is Telehealth and why is it important to the VA?

The VA is America's largest integrated healthcare system with over 1,700 sites of care, serving 8.76 million veterans each year. The number of veterans using telehealth services has greatly increased in the last four years. The mission with TED is to increase the use of telehealth within the VA by raising the awareness and understanding of how Telehealth can improve overall efficiency while enhancing patient access, outcomes and experiences.

Veterans and hospital staff are invited to tour TED and learn about the various telehealth technologies on board.

To learn more about TED, visit the [VA Telehealth Website](#) or TED2Go.com/media.

WHAT: TED Bus Tour / Demonstration
WHEN: Tuesday, Apr. 7, 2015, 11-3pm
WHERE: VA Central CA Health Care System, [Parking Lot "C"]
2615 East Clinton Avenue, Fresno, CA

Note: Media is invited to tour the vehicle and attend a special demonstration at 11:00 am. For more information, please contact Cenethea Lofbom at 559-228-5308 or 559-225-1400 (BB) or cenethea.lofbom@va.gov.
